EXPERIENCE

Power BI & Power Automate Developer Internship

Sodexo

03/2024 - 09/2024 | Paris, France

- Built Power BI dashboards to monitor KPIs and project progress, helping managers make faster and more data-driven business decisions.
- Developed and maintained Power BI dashboards to visualize KPIs, track performance, and enable efficient operational reporting.
- Boosted reporting productivity by 15% through computerized Power Automate workflows, reducing manual effort and data refresh time.
- Partnered with cross-functional teams to improve data pipelines, ensuring seamless reporting and faster data availability.

Data Analyst & Project manager

InsightMetrics Consulting Private Limited

09/2024 - 12/2024 | Remote, France

- Used SQL, Python, and Power BI to analyze trends, optimize workflows, and improve the efficiency of business operations and growth.
- Executed detailed analysis using SQL, Python, and Power BI to extract meaningful business insights for data-driven decision-making.
- Planned and developed interactive Power BI dashboards to visualize KPIs and provide stakeholders real-time insights for better decision-making.
- Optimized and a mechanized data workflows to enhance reporting speed, accuracy, and reliability across business operations.

Business & Data Analyst Apprentice

InsightMetrics Consulting Private Limited

08/2023 - 08/2024 | Bengaluru, India

- Conducted market and operational data analysis using Python and Power BI to uncover insights and support business growth strategies.
- Increased strategic alignment by 30% developing performance dashboards for data-driven decision-making.
- Enhanced reporting accuracy and reliability by implementing advanced data validation and transformation processes.

Machine Learning Engineer Intern

Airbus India Operations Private Limited

01/2023 - 07/2023 | Bengaluru, India

- Applied ML algorithms like Linear & Logistic Regression and Decision Trees using Python and R to predict trends in aviation operations.
- Built predictive models with Python and R to enhance maintenance planning, reduce downtime, and improve operational efficiency.
- Created dynamic Power BI dashboards to visualize aviation data insights and support data-driven decision-making across teams.
- Preprocessed, cleaned, and transformed aviation data to improve model accuracy, performance, and overall data reliability.

EDUCATION

Masters in Data Science & Business Analytics

EDC Paris Business School

01/2025 - 01/2026 | Paris, France

- Focuses on data-driven decision-making through advanced analytics, machine learning, and visualization. Skilled in Python, R, and Power BI to analyze complex datasets, extract actionable insights, and solve business challenges. Combines strong technical expertise with strategic thinking to drive impactful results.

SUMMARY

Data professional with 3 years of experience in analysis, visualization, engineering, and data-driven decision-making. Skilled in transforming complex datasets into actionable insights using Tableau, Power BI, SQL, and Python. Proven ability to optimize reporting processes, build efficient data pipelines, and support strategic business decisions. Motivated to apply analytical expertise to deliver impactful reporting and drive business growth.

KEY ACHIEVEMENTS

Optimized Maintenance Schedules

Implemented models reducing downtime and improving fleet efficiency by.

Enhanced Decision Dashboards

Designed dashboards improving decision-making speed.

Automated Reporting Efficiency

Boosted reporting efficiency by using automated Power Automate workflows.

TECHNICAL SKILLS

BI & Data Tools:

Power BI, Tableau, Advanced Excel, SQL, Python, SAP BI, ETL, Data Warehousing, Data Engineering Airflow, dbt, Apache Spark, Pandas

Cloud & Data Platforms:

Azure, AWS,Google BigQuery, Snowflake, Microsoft Fabric,Cloud Storage & Pipelines

Automation & AI:

Machine Learning,Deep learning,Power Automate, Power Apps, KPI Frameworks, Robotic Process Automation, Generative AI, LLMs,Agenetic AI

STRENGTHS

Data analysis expertise

Proficiency in analyzing and visualizing complex data sets.

Workflow Automation

Skilled in automating workflows, increasing reporting efficiency.
